EDUCATION

Olin College of Engineering – Needham, Massachusetts May 2029
Bachelor of Science : Electrical and Computer Engineering | GPA:4.0

- Relevant Coursework: Model Simulation, Quantitative Engineering Analysis, Software Design, Introduction to Sensors, Instrumentation and Measurement, Computer Architecture

SKILLS

Programming Languages: MATLAB, Python(Pygame, Pytest, Pandas, OpenCV, MediaPipe), SystemVerilog, Arduino/C++
Software & Tools: OSS CAD Suite, Yosys, Iverilog (Icarus Verilog), GTKWave, SolidWorks, Microsoft Office
Hardware & Fabrication: Soldering, Crimping, Laser Cutting, 3D Printing

EXPERIENCE

Olin Baja – *Needham, Massachusetts* 2025-2026
Electrical Subteam

- Researched a GPS-based data acquisition system to capture race telemetry and generate accurate vehicle path traces for performance analysis.
- Integrated brake light and kill switch systems
- Performed rapid electrical troubleshooting and repairs under tight pit-stop time constraints during endurance competition, ensuring vehicle safety compliance and maximum uptime.

PROJECTS

Desk Companion Robot – *MakeMITxHarvard Hackathon* *Feb* 2026

- Awarded **2nd Place – Healthcare Track**.
- Integrated the robot's electrical architecture on a 6-person team, designing and implementing circuitry for sensors, motors, and an LCD interface.
- Executed hardware prototyping, precision soldering, and full system wiring to ensure robust power distribution and reliable signal integrity and performance.

Interactive River Bubble Game | *Python, OpenCV, MediaPipe, Pygame, PyTest* *Spring* 2026

- Worked with a team of 3 to build an interactive 2D game in Pygame controlled via live webcam feed using OpenCV and MediaPipe hand landmark tracking.
- Programmed real-time gesture control mapping open/closed hand combinations to lateral sprite movement across dynamic track obstacles.
- Integrated collision detection physics for environmental hazards and created unit test suites with PyTest to verify game state stability.

32-Bit RISC-V Processor Core – *Computer Architecture, Olin College* Expected Dec 2026

- Designing a multicycle, 32-bit RISC-V processor.
